

# SSEA Paper CAPIBARA Collaboration

author1\*      author2      for the **CAPIBARA Collaboration**<sup>†</sup>

January 2, 2026

## Abstract

This is our abstract.

**Keywords:** keyword1, keyword2, keyword3

## 1 Introduction

## 2 CRD

### 2.1 Instrument Design

### 2.2 Scientific Motivation

### 2.3 Current Status

## 3 COSMOS

This will basically be a mix of the COSMOS Program statement document and the Duo-MCD.

*Introduction...*

### 3.1 Motivation & Scientific Value

Scientific reasoning and synergies with GW observatories

### 3.2 Timeline

COSMOS-Duo as pathfinder, COSMOS-Net as ultimate goal.

### 3.3 Time-Delay Localisation

### 3.4 COSMOS-Duo

#### 3.4.1 CubeSat (platform) & Orbit requirements

#### 3.4.2 Instruments

#### 3.4.3 Data Management (Software)

## 4 Team & Partnerships

## 5 Funding

]

---

\*affiliation

<sup>†</sup>Collaboration for the Analysis of Photonic and Ionic Bursts and RAdiation

## 6 Conclusion

This is our Conclusion.

## Acknowledgments

We are grateful to the members of the CAPIBARA Collaboration for useful discussions and feedback. The CAPIBARA Collaboration is an international student initiative to explore the high energy universe. We thank the developers of the open-source tools used in this work. We welcome feedback and collaboration, please contact the corresponding author or visit our website: [capibara3.github.io/contact](https://capibara3.github.io/contact).

## Author Contributions

*X.Y.Z contributed to the ... and ... sections. A.B.C. developed ... and ....*

## Code and Data Availability

## Conflict of Interest

The authors declare no conflict of interest.
